

I have long understood that submitting my website to directories is the [way to go](#) about it. The problem is, I have absolutely no idea which directories are worth using, and which directories are just going to waste my time. I invested in **BuyOriginalContent.com** Directory Submission service after a friend recommended me to them. I asked them a few questions before hand and they were quick to reply back. I placed my order and waited a few weeks. Low and behold, within a matter of three weeks, I had hit the first page on Google and the traffic started coming in. I've already made enough profit from one keyword being on the front page of Google to pay for the costs of their directory submission service. I am launching a new website soon and will definitely use this service. It's an inexpensive way to get good rankings and I can't fault them at all!

Review from Ten/Directory Submission

Hubpage creation is a great way to get targeted one-way traffic that converts extremely well. Unfortunately, I don't have the time nor effort to make these myself. I'm glad to say that **BuyOriginalContent.com** have done a great job of writing SEO optimized Hub's that are currently ranking well in Google. Their level of writing is superb and they have put just the right amount of keywords in the content to rank them well. It's been two weeks now and I've already started to see referral traffic coming from the hubs they have created for me. These are long-term investments too, because they will never disappear. I can't moan at the fact that my e-mail subscription list is constantly growing. I may just invest in several more hubpages to begin getting more targeted traffic. Absolutely fabulous service from these guys. Will be back for more very soon!

Review from Jane/HubPage Creation

As an internet entrepreneur, I currently have a portfolio of over 60 websites. I generally add a new website to my portfolio every week or so. Keeping all of my sites up-to-date with fresh content is extremely time consuming. Not to mention the fact that I need to submit a press release every time I launch a new site. Then, I have to create web 2.0 pages and hubpages for added one-way backlinks and so forth. By outsourcing the work to **BuyOriginalContent.com**, I've been able to focus on actually marketing the site and building the website to within my own SEO standards. Once they deliver the order, I can schedule the fresh content to be published every few days – which gives Google's the signs it needs to rank them well. I have used **BuyOriginalContent.com** for months now, and will [continue](#) to use them for every new site I make!
